1. [REDACTED] called me today (I told [REDACTED] that I was on a special TDY but I would relay his message to OSA) and said that he is now working on the Dave Brandwein and [REDACTED] papers relating [REDACTED] Hal now wants to prepare a paper supporting in some fashion this requirement. He said that he is a little rusty on the U-2R and camera and [REDACTED] etc. He, therefore, requests that someone come over to his office and bring him up to date. He said someone from - formerly [REDACTED] office could be helpful. [REDACTED] telephone number is extension 6221 and his office is Room 7E-22. I said that someone would call and arrange for an appointment.

2. Inasmuch as [REDACTED] has been working in this requirements area and is most knowledgeable of the FMSAC and OSI discussions relating to the foregoing, I would suggest that he accompany whoever is sent to see [REDACTED] from Operations.
